

WFDSS NextGen

Focus Group Session 5 –
What to Do with Legacy Data?

WFDSS Next Gen – Legacy data can be accessed from the REPORTS tab. Users can access both Incident and Analysis data via an interface that is like the Legacy WFDSS application. Below is the Analysis Data search filter

The screenshot shows the WFDSS Reports page with the 'Reports' tab selected. The page includes a navigation bar with 'My Home', 'Incidents', 'Analysis', 'Reports', 'Resources', and 'Contact Us'. The 'Reports' section is expanded to show 'Legacy Analysis Data'. The search filter interface includes input fields for 'Incident Name', 'IRWIN ID', 'Year', and 'Analyst', with radio buttons for 'Partial Match' and 'Exact Match'. There are also sections for 'Date Filters' (Start and End dates), 'Analysis Filter' (with checkboxes for 'Any', 'FSPRO', 'FARSITE (NTFB)', 'MTT (STFB)', and 'FlamMap (Basic)'), and 'Status Filter' (with checkboxes for 'Any', 'Completed', and 'Review'). Below these are four dropdown menus: 'Geographic Area', 'State', 'Jurisdictional Agency', and 'Unit'. A 'Search' button is located at the bottom of the filter section.

WFDSS Next Gen – Legacy analysis data accesses

- Users can access:
 - Landscape files
 - Analysis Shapes
 - Analysis results
 - Analysis Reports - includes Inputs and Acceptance notes
 - View all analyses runs regardless of status
 - Download only COMPLETED Analyses

WFDSS Next Gen –Users can access Incident data via an interface that is like the Legacy WFDSS application. Below is the Incident Data search filter.

The screenshot shows the WFDSS Next Gen web application interface. At the top, there is a navigation bar with the WFDSS logo and links for My Home, Incidents, Analysis, Reports (highlighted), Resources, and Contact Us. On the right side of the navigation bar, it displays 'GA Preparedness Level: XX | National Preparedness Level: XX'. Below the navigation bar, the main heading is 'Reports' with a link 'Set as homepage'. There are three expandable sections: 'NextGen Automated Reports', 'NextGen Custom Reports', and 'Legacy Incident Data'. The 'Legacy Incident Data' section is currently expanded and contains the search filter. The search filter includes three text input fields for 'Incident Name', 'IRWIN ID', and 'Year'. Below these fields are radio buttons for 'Partial Match' and 'Exact Match'. Underneath is the 'Date Filters' section, which has four columns of filters. Each column has a radio button for the filter type and a sub-section with 'On' and 'Off' radio buttons, a date input field, and a calendar icon. The filter types are: 'Any discovery date', 'Any contained date', 'Any controlled date', and 'Any out date'. Below the date filters are four dropdown menus for 'Geographic Area', 'State', 'Jurisdictional Agency', and 'Unit'. Each dropdown menu is open, showing a list of options. The 'Geographic Area' dropdown lists: Alaska, Northern California, Southern California, Eastern, Great Basin, Northern Rockies, Rocky Mountain, Southern, Southwest, and Pacific Northwest. The 'State' dropdown lists: Arizona, New Mexico, and Oklahoma. The 'Jurisdictional Agency' dropdown lists: Bureau of Indian Affairs/Tribal, Bureau of Land Management, Other Agencies, Park Service, State of Equivalent, Tribal Government (non-trustlands), US County/Local, US Fish and Wildlife Service, US Forest Service, and Not Set. The 'Unit' dropdown lists: Apache Sitgreaves, Caron, Cibola, Coconino, Coronado, Gila, Lincoln, Kalbop, Prescott, Santa Fe, and Tonto. At the bottom of the search filter is a 'Search' button. Below the search filter is another expandable section for 'Legacy Analysis Data'. At the very bottom left, there is a 'Return to top' link.
