

WFDSS NextGen

- User Roles

Overview of Roles in WFDSS NextGen

- Flattening out roles (Wider permissions)
- Roles are becoming additive, so every role builds on the previous
- Users will only hold one role in the application at a time
- Application roles will be controlled through iNAP

▸ Deprecated Roles in WFDSS NextGen

- Dispatcher – NextGen will only ingest incidents from IRWIN and no longer create incidents manually (except in Training)
- Data Manager – Spatial Fire Planning will no longer be managed in WFDSS and instead it is being migrated to the Spatial Fire Planning Service.
- Administrator – Many of the tasks' Administrators needed to do are no longer necessary
